

Nonstop performance made simple

Built to keep moving, the OIL230 drives nonstop performance with simultaneous vacuum and discharge—streamlining every step of chips and oil recovery. This machine is made for reliability—and more importantly, so is your operation.

The OIL230 is a durable, portable, and user-friendly industrial vacuum designed to help metalworking companies boost productivity during coolant recovery and chips separation.

It enables continuous cleaning with minimal downtime, while enhancing worker safety, preserving product quality, and maximizing the reuse of valuable resources.

The OIL230 is the new standard in metal chip collection and coolant recovery.

- Uninterrupted workflow – Vacuum and discharge can easily be operated by a single operator, thanks to the practical gun clamp
- Highly compact and mobile – Van-friendly (1.4 m height) and easy to maneuver
- Smart storage – Onboard hose holder and accessory management for faster setup
- Overfill protection – Automatic liquid shutoff with operator alert
- Simplified workflow – Easy chips basket removal and reinsertion without disassembly
- Ergonomic access – Chips basket at belt height for safer, easier handling
- Leak prevention – Optional anti-drip tray and sealed design help prevent spills and slips
- Clean work zones – Keeps chips and oil away from parts and production areas
